ABOUT US

With over 20 years of experience, VB Arms has established its reputation as a leading manufacturer of state-of-the-art hunting rifles. Our journey began with the vision of producing hunting rifles that are not only reliable, but also safe and user-friendly. Twenty years later, our unwavering commitment to this vision has allowed us to meet the unique needs of our diverse customer base. We continue to produce VB ARMS, Lever Action Shotguns, Semi-Automatic Shotguns, Double Shotguns, and Magazine Shotguns with an expert and professional team. We are committed to providing the highest quality hunting rifles that meet the diverse needs of our customers.

We are excited for the future and look forward to continuing our tradition of innovation, reliability and customer satisfaction.

PHANTOM

PT12 (CK21)

3,5- 3,9 KG

CALIBER	12 GA	SYSTEM	GAS OPERATED SEMI AUTO	LOWER RECEIVER	ALUMINUM	UPPER RECEIVER	ALUMINUM
CHOKE	MOBIL / SLUG	BARREL LENGTH	47 / 51 CM - 18,5" / 20"	STOCK	SYNTHETIC & TELESCOPIC	MAGAZINE CAP.	2 / 5 / 10

Manufactured by VB ARMS, the PHANTOM PT12 is a modern, magazine-fed 12-gauge shotgun developed for sportive shooting applications. Featuring a rear-spring, AR-type operating system, the platform delivers balanced recoil management and enables fast, controlled follow-up shots. The telescopic stock utilizing an AR-type buffer tube, combined with an AR-style pistol grip, allows easy adaptation and modification for different shooter profiles.

Without requiring additional purchases, the shotgun is supplied with an aluminum fore-end, magwell, compensator, M-LOK to Picatinny adapter, and two standard iron sight sets—one folding and one high-profile—offered as part of the box contents. This comprehensive package provides users with extensive customization options tailored to their operational needs.

The flat-faced trigger, enlarged magazine release button, and ambidextrous enlarged charging handle enhance speed and control during operation, making the PHANTOM PT12 an

PHANTOM**PT12 M-LOK (CK01)****CK05****CK06****CK10****CK17****CK18****CK19****CK20**

Compared to the standard PT12, the fore-end of the PHANTOM PT12 M-LOK features a full M-LOK slot configuration on the bottom, top, sides, and angled surfaces. Its cleaner and more streamlined design provides maximum modularity, allowing users to configure the platform according to their specific shooting requirements.

**PT12 LONG [CK10]****CK12****CK13****CK14****CK15****CK16**

Unlike the standard PT12, the PHANTOM PT12 LONG is developed with an extended fore-end. The increased gripping surface and expanded accessory placement provide enhanced control and improved handling during use.

PHANTOM***PT12 SHORT (CK06)******CK10******CK18***

In addition to the standard PT12 configuration, the PHANTOM PT12 SHORT offers barrel options shorter than 47 cm. Its more compact overall profile makes it ideal for use in confined spaces and for applications requiring fast maneuverability.

CHOKE	MOBIL / SLUG	BARREL LENGTH	47 / 51 CM - 18,5" / 20"	STOCK	SYNTHETIC & TELESCOPIC	MAGAZINE CAP.	2 / 5 / 10

VB ARMS DRACULA is a modern, magazine-fed 12-gauge shotgun designed with a focus on sportive shooting. Its gas-operated system provides a balanced recoil impulse and a reliable cycling performance, enabling controlled and consistent rapid fire. The polymer lower receiver combines lightweight construction with durability, while the AR-type buffer tube interface makes the platform highly adaptable and open to modification.

This configuration allows the shotgun to be manufactured with either telescopic or fixed stock options, ensuring compliance with the legal requirements of different countries. The AR-style pistol grip offers ergonomic handling and comfort during extended use. Supplied as standard with two iron sight sets—one folding and one high-profile—the DRACULA allows users to customize the setup according to their specific needs. Thanks to its modular design, the DRACULA stands out as a reliable platform for sportive and dynamic shooting disciplines.

BAPS

BULLPUP

BAPS

BAPS (CK01)

3,5 KG

CALIBER	12 GA	SYSTEM	GAS OPERATED SEMI AUTO	LOWER RECEIVER	SYNTHETIC	UPPER RECEIVER	ALUMINUM
CHOKE	MOBIL / SLUG	BARREL LENGTH	47 / 51 CM - 18,5" / 20"	STOCK	FIXED SYNTHETIC	MAGAZINE CAP.	2 / 5 / 10

The VB ARMS BAPS is a compact, 12-gauge semi-automatic shotgun built around a bullpup configuration, where the magazine and action are located behind the trigger assembly. This design significantly reduces overall length while preserving full barrel length, resulting in a highly maneuverable and controllable platform.

Optimized for tight spaces such as vehicles and indoor environments, the BAPS excels in scenarios like home defense where agility is critical. Given that barrel lengths under 47 cm are restricted in many regions worldwide, the BAPS stands out as one of the shortest and most ergonomically balanced shotguns achievable within legal limits. Its gas-operated semi-automatic system ensures consistent and smooth operation, while the bullpup layout provides a centered weight distribution for stable, comfortable handling despite its compact dimensions.

BAPS

BAPS-X (CK01)

CALIBER	12 GA	SYSTEM	GAS OPERATED SEMI AUTO	LOWER RECEIVER	SYNTHETIC	UPPER RECEIVER	ALUMINUM
CHOKE	MOBIL / SLUG	BARREL LENGTH	47 / 51 CM - 18,5" / 20"	STOCK	FIXED SYNTHETIC	MAGAZINE CAP.	2 / 5 / 10

VB ARMS BAPS-X is a compact 12-gauge semi-automatic shotgun featuring a bullpup architecture in which the magazine and operating system are positioned behind the trigger group, allowing the overall length to be minimized without sacrificing barrel length. This configuration provides excellent maneuverability and control, particularly in confined environments such as vehicle use and home defense scenarios.

As barrel lengths shorter than 47 cm are legally restricted in many parts of the world, the BAPS-X is positioned as one of the shortest and most well-balanced platforms achievable within current legal frameworks. Its gas-operated semi-automatic system delivers a smooth and reliable cycling performance, while the balanced center of gravity inherent to the bullpup design ensures controlled and comfortable handling despite its compact form.

VB ARMS P12-T Pump-Action Series features an ergonomic synthetic stock available in classic or pistol-grip configurations, with options for both telescopic and fixed designs. Polymer fore-ends in various designs offer a secure grip and balanced control, while their modular structure allows for easy customization and modification.

Optimized to operate reliably with cartridges of different load weights, this 12-gauge shotgun delivers consistent performance across a wide range of use scenarios. The accessory-ready interface on the upper receiver enables the mounting of red dot optics and similar sighting systems, allowing the shotgun to be configured according to its intended purpose.

Developed with a focus on durability, functionality, and versatility, the P12-T Pump-Action Series provides a well-balanced and dependable solution for field use, defensive applications, and hunting.

P12

P12-SW01

P12-S01

CALIBER	12 GA	SYSTEM	PUMP ACTION	RECEIVER	ALUMINUM	CHAMBER	3" / 76 MM
CHOKE	MOBIL / SLUG	BARREL LENGTH	47 / 51 / 55 / 61 / 65 / 71 / 76 CM 18.5" / 20" / 21.7" / 24" / 25.6" / 28" / 30"	STOCK	FIXED	MAGAZINE CAP.	3+1 / 4+1

VB ARMS P12-S Pump-Action Series is offered with ergonomic synthetic pistol grip or classic walnut straight stock options. In addition, polymer and walnut fore-ends in various designs provide a secure grip and balanced control, while their modular construction allows for easy customization. Optimized for reliable operation with cartridges of different load weights, this 12-gauge pump-action shotgun delivers consistent performance across a wide range of use scenarios.

Barrel length options of 33–36 cm provide a compact overall profile and high maneuverability.

Despite the inherently limited magazine capacity resulting from its short dimensions, the high stopping power of the 12 gauge offers a strong and deterrent effect for personal defense applications.

Developed with a focus on durability, functionality, and versatility, the P12-S Short Pump-Action Series represents a dependable solution for defensive use.

P12-W01

VB ARMS P12-W Pump-Action Series features a classic wooden stock and wooden fore-end crafted from walnut, providing a balanced grip and controlled handling thanks to the natural characteristics of the material. Optimized for reliable operation with cartridges of varying load weights, this 12-gauge pump-action shotgun delivers consistent performance across a wide range of use scenarios

The cantilever front sight positioned on top of the barrel allows for rapid target acquisition and improved focus on the target. Developed to combine durability, functionality, and traditional aesthetics, the P12-W Pump-Action Series offers a well-balanced and dependable solution for hunting and field use.

VB ARMS REGENT 12 GA Single-Trigger Selective Side-by-Side Shotgun combines the traditional aesthetics of a classic side-by-side shotgun with a modern single-trigger selector system, appealing both to hunters who favor classic design and to shooters seeking practical operation. Its well-balanced structure and ergonomics that promote a natural mount enable fast and controlled shooting.

A reliable locking system and robust steel receiver construction ensure long service life, while the single-trigger selector mechanism allows the firing sequence to be easily controlled. Chambered in 12 gauge, the REGENT is optimized to operate consistently with various types of ammunition, delivering dependable performance for hunting and field use. In addition to its clean and classic versions, the REGENT Series is also offered with engraved receiver options, providing alternatives for users who prefer traditional aesthetics enhanced with richer detailing. With its elegant lines, functional design, and reliable mechanism, the VB ARMS REGENT 12 GA represents a balanced and prestigious solution that blends classic side-by-side tradition with modern ease of use.
